LET YOUR LIGHT SHINE

Clinic staff, Tanneh and Diana, rushed to assist a mother who wasn't able to reach the clinic in time and gave birth to a healthy baby boy on a trail in the bush.

Born-on-the-Road

We've had 3 deliveries in the past 30 days that haven't quite made it to the clinic. Sundayway lives in Doe's Town, a village that's about an 8-hour hike from the clinic... on a good day. Her labor pains started on a Monday morning, so she began her walk to the clinic. By nightfall Sundayway had reached John Browne Town. With it getting dark, and there being another 2-hour hike and a man-grove swamp (with crocodiles) between her and the clinic, she decided to stay in the town for the night. Early the next morning she and the town's TTM (Traditionally Trained Midwife) set-out for the clinic.

During our morning devotion on Tuesday, word reached the clinic that a "big-belly" was in labor near the creek behind the mission and couldn't make it to the clinic. After scrambling to throw instruments and towels in a bag, our midwife and dispenser (who is trained as a nurse aid) took off toward the delivery. About 30 minutes later they returned, mother and baby in tow. After all that walking she ended up delivering less than a mile from the clinic doors!

Ebola Update

27 days in to our 42-day-Ebola-Free countdown (i.e. no new cases) a woman tested positive in Monrovia. Active transmission still continues in Guinea and Sierra Leone, so this epidemic is far from over. We are proud of our staff for continuing to promote awareness in our community and following measures to stay safe. Please pray with us that this epidemic would end soon.

Newest Staff Member

Introducing Bacon, the newest member of the clinic. He enjoys short-walks on the beach, ramen noodles with tuna fish, and the smell of Steve's shoes (still can't figure out THAT one)!

Go Buckeyes!

Steve and Jen teach the Po River community how to hold a proper game day celebration on Ohio State's run to another National Championship!

Bearing Fruit

Two years ago we planted the crown of the first pineapple we ate while living in Po... and now we have a baby pineapple!!!

Financial Update

The Po River Medical Clinic has been open and operating since November 2013. Currently our total support, capital and operational budget for 2015 is \$120,000. We are really praying to increase the number of Monthly Donors that are supporting the clinic this year. The average cost per patient for examination, lab testing and treatment is only \$30. This includes all the added safety protocols and equipment for ongoing Ebola protection.

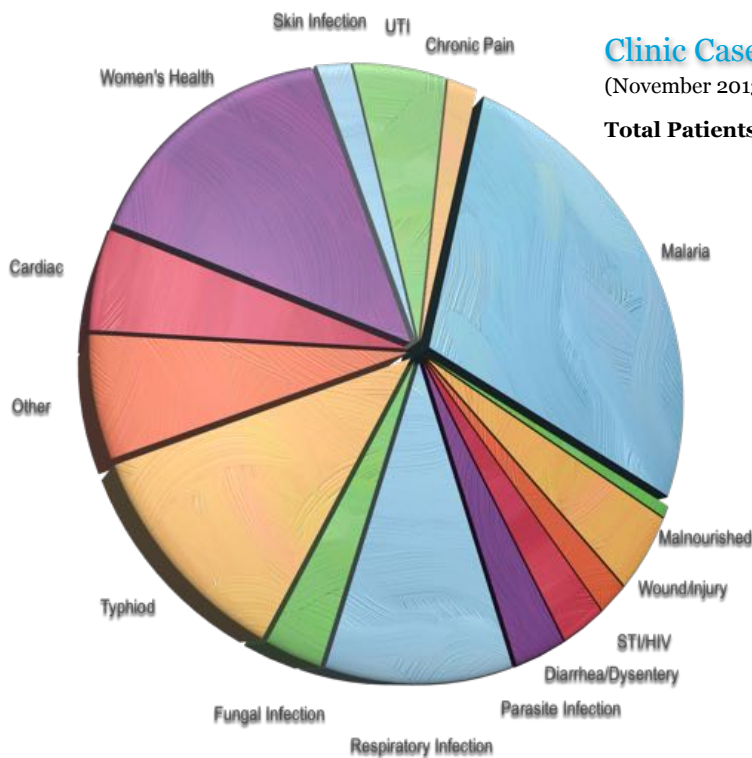

Please help us by making a pledge of \$28/month. For the amount of two pizzas you can give someone hope and healing in Po River.

Thank you to all who have been giving generously to the Po River Medical Clinic. Your love and sacrifice are appreciated and help motivate us to keep pressing on! :)

Clinic Case Statistics

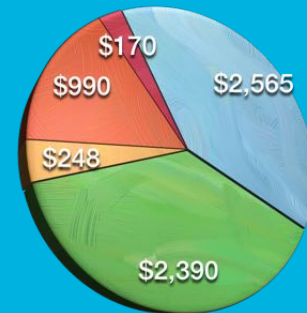

(November 2013-March 2015)

Total Patients: 3,164

Clinic Monthly Operational Expenditures (2014)

Average Cost per Patient = \$28

- Staff Salaries
- Medicine & Supplies
- Cleaning & Office Supplies
- Logistics
- Maintenance & Repairs

ALL DONATIONS TO THE PO RIVER MEDICAL CLINIC ARE TAX-DEDUCTIBLE. Commission To Every Nation (CTEN) is a recognized 501(c)(3) non-profit organization by the IRS.
